Anxiety is a common human feeling that we all experience at some time in our lives. Many of us feel anxious, or nervous, when faced with stress, difficult situations or challenging decisions. When our levels of anxiety, worry and fear, however, begin to interfere with day to day life, it is time to develop more effective ways to manage our anxiety and restore a healthier emotional balance.

Overcoming Anxiety is a six (6) session psycho-educational program designed to provide you with the basic tools for managing anxiety more effectively. The seminar is based on the principles of Cognitive-Behavioral Therapy, a highly effective therapeutic method for anxiety reduction. The program will cover:

- the biology of fear and anxiety
- the psychological roots of anxiety reactions
- controlled breathing and relaxation techniques
- thinking patterns that trigger anxiety and how to change those patterns
- building self-esteem
- assertive communication

The program runs for six (6) Wednesday evenings, in an engaging, enjoyable format. Individuals age 16 years or older are welcome.

Overcoming Anxiety is facilitated by Dr. Thomas Finn, a licensed psychologist with over 35 years of experience in treating anxiety conditions with Cognitive-Behavioral Therapy.

“Dr. Finn gave me practical tools to deal with my daily situations of anxiety.”

Former Participant

“The most profound lesson I learned was that so many of my thoughts were ‘automatic thoughts’ based on unrealistic beliefs. Once I began to deal with more realistic thinking and became conscious of my patterns I started to move in a new, more positive and healthy direction. The experience of this class changed my life.”

Former Participant

“Dr. Finn provides techniques and exercises that have changed the way I think about myself and the world. I would highly recommend his class to anyone who is looking for help coping with anxiety.”
